Message from the Rector of Huflit

Human beings are coming into the 2nd decade of century XXI. Although there have been many difficulties caused by economic crisis, technologies have been developing quickly and education and training have contributed to such a magnificent and very important process. Obviously, Vietnam has had many problems but education training have considerable achievements.

On our developing process, together with the world, HUFLIT has trained and provided the society with more than 10.000 graduates and information technology engineers recognized by the society. Interlectuals from Huflit have been contributing to the mission of building and protecting Vietnam actively. Many former students have been designated and promoted to higher and important positions in the domestic and joint-venture businesses and organizations. In addition, a lot of students have got master and doctor degrees from different famous international universities. Besides, Huflit students got higher prizes in national Olympic IT competitions and in the scientific research competitions for students held by MOET. In particular, a considerable number of excellent students from Huflit won the best prizes in Dynamic Contest- Future Businesses in International Champion ... Additionally, outstanding students won scholarships to study abroad. Huflit International Relations have been more and more improved and enlarged.

Since 2010- 2011, Huflit has offered credit-based programs. In order to achieve our training objectives, curriculums and materials used for students are regularly updated and get access to technological renovations. Teaching staff of different subjects are refreshed with new, advanced knowledge and teaching methods. Campus facilities are regularly improved.

Below is our action slogan

“Solidarity – Cooperation – Discipline – Quality – Development”.

Mission

Huflit has helped learners to master a job according our traditions “nhất nghệ tinh, nhất thân vinh” (Being expert in one career will help oneself be successful and honoured all life), to have patriotism, the awareness of preserving national characters, and the ability of creating, thinking, practising, using foreign languages, and knowing how to use computer as a tool effectively to organize and control one’s career well, a thirst for knowledge to improve personality and ability for further education; simultaneously, to persue other new professions in the process of modernization and industrialisation.

Training time and process.

HUFLIT has implemented credit-based curriculum since 2010 . Normally students’ study time for 38 weeks per year including 2 main semesters (15weeks for each) and 1 summer semester (8 weeks).Students have to spend at least 4 years to complete the undergraduate course to get university degree.
